RESEARCHED VISIBILITY PACK | NO-CODE | 100 PAGES

TEMPLATE MARKETPLACE SEO PLAYBOOK

Optimize template products for Etsy-style search, Gumroad discovery, Pinterest, Google, and AI answer engines.

SEO Keyword Map

Short-tail: template SEO

Mid-tail: digital template SEO

Long-tail: SEO for Canva Notion spreadsheet templates

Educational business resource. No sales, ranking, traffic, or income outcome is guaranteed.

Abstract And Buyer Thesis

Abstract: This manual studies a practical path for template sellers who want visibility across marketplaces and search engines. It focuses on a low-budget, no-code method for turning expertise into a search-visible product.

Problem statement: their templates are useful but titles, thumbnails, keywords, and proof do not match buyer intent.

Working thesis: Template SEO works when the listing mirrors the buyer's exact use case and shows the asset clearly.

Practical promise: create keyword-led template listings, preview assets, FAQs, and support pages that attract targeted buyers.

Practical Action

- Write the buyer in one line.
- Write the paid pain.
- Write the expected product output.
- Remove vague promises.

SEO Title And Keyword Architecture

Short-tail title target: template SEO.

Mid-tail title target: digital template SEO.

Long-tail title target: SEO for Canva Notion spreadsheet templates.

Use all three levels: short-tail for category relevance, mid-tail for buyer fit, and long-tail for high-intent pages, FAQs, product descriptions, and comparison posts.

AI Agent Prompt

Act as an SEO strategist. Expand these short, mid, and long-tail keywords into product page sections, FAQs, and support articles.

Practical Action

- Create one product page.
- Create three support pages.
- Add FAQ blocks.
- Track queries weekly.

Research Base And Platform Assumptions

Google Search Central: Helpful, people-first content and structured data support discoverability when pages are useful, transparent, and machine-readable.

Google Product Structured Data: Product pages can expose price, availability, ratings, media, and merchant details through eligible structured data.

Stripe Payment Links: No-code hosted checkout links can sell products, subscriptions, discounts, and simple direct offers.

Gumroad Help: Digital downloads, memberships, email, product pages, bundles, discounts, and customer libraries support lean creator commerce.

Payhip Features: Digital downloads, courses, coaching, memberships, store pages, affiliates, and EU/UK VAT support product sellers.

Framer Docs: No-code websites, CMS, SEO controls, localization, analytics, redirects, forms, and JSON-LD help build product funnels.

Research conclusion: build useful assets first, then connect search pages, structured product facts, no-code checkout, and buyer support.

Practical Action

- Verify platform rules.
- Check current fees.
- Review AI policy.
- Add human examples.

No-Code Ecosystem Evidence

Notion Help: Databases, sites, forms, automations, templates, and AI support low-budget knowledge products and portals.

Softr Docs: Client portals and internal tools can connect to Airtable, Google Sheets, Notion, HubSpot, SmartSuite, and SQL data sources.

Zapier AI: Automation, AI agents, tables, interfaces, and app connections support no-code operating workflows.

Make AI Agents: Visual automation and AI agent workflows can route tasks, apps, decisions, and outputs.

n8n Docs: Workflow automation and AI nodes support agentic workflows with human review and data operations.

Canva Policies: Templates and designs need original packaging, clear license boundaries, and platform-rule review before resale.

Practical conclusion: the same buyer result can usually be shipped manually first, then improved with no-code automation after demand appears.

Practical Action

- Pick manual version.
- Pick cheap stack.
- Define upgrade trigger.
- Document the workflow.

Tech Stack Matrix

Primary low-budget stack: Canva, Google Sheets, Pinterest, Gumroad, Payhip, Framer or Carrd, Google Search Console.

Possible stack universe: Google Docs, Google Sheets, Canva, Notion, Airtable, Coda, Tally, Typeform, Gumroad, Payhip, Stripe Payment Links, Carrd, Framer, Softr, Glide, Zapier, Make, n8n, MailerLite, ConvertKit, beehiiv, Buffer, Metricool, Pinterest, Google Search Console, Google Analytics, Looker Studio.

Stack rule: do not buy a tool because it is impressive. Use a tool only when it makes publishing, selling, delivery, support, automation, or analytics easier.

AI Agent Prompt

Act as a no-code architect. Recommend a minimum stack, cheap stack, and upgrade stack for this product.

Practical Action

- Choose 5 tools max.
- Assign one job per tool.
- Use free tiers first.
- Review upgrade costs.

Manual Path Before Automation

Manual path:

- research autocomplete
- write listing title
- create preview image
- write FAQ
- pin examples
- track clicks

Automation should copy a proven manual workflow. If the manual steps are unclear, automation will only hide confusion.

AI Agent Prompt

Turn this manual workflow into a simple SOP with owner, input, output, and quality check for each step.

Practical Action

- Run the manual path once.
- Write each step.
- Find the slowest step.
- Automate only that step.

Academic Structure And Table Of Contents

Core product: SEO listing workbook and keyword asset system.

Learning outcomes: define the buyer problem, choose a stack, complete the manual path, create assets, publish the sales page, launch content, and measure improvement.

Academic structure: abstract, definitions, method, modules, applied exercises, templates, review gates, appendix, and publishing audit.

Contents: 12 chapters cover search demand, buyer model, low-budget stack, manual workflow, AI agents, product structure, asset production, SEO pages, launch flywheel, checkout, analytics, and portfolio expansion.

Practical Action

- Write outcomes.
- Define key terms.
- Follow chapters in order.
- Create review rubric.

Search Demand Thesis: Research Question

Research question: how can template sellers who want visibility across marketplaces and search engines use search demand thesis to move from a vague idea to a valuable digital product?

Chapter goal: Define the short-tail, mid-tail, and long-tail demand that the book can own.

The buyer pain is specific: their templates are useful but titles, thumbnails, keywords, and proof do not match buyer intent. The page should turn that pain into a visible decision, asset, workflow, or search page.

AI Agent Prompt

Act as Keyword Miner. For Template Marketplace SEO Playbook, create a practical Search Demand Thesis deliverable using Canva. Include steps, asset, QA, and SEO angle.

Practical Action

- Write the research question.
- Name the buyer assumption.
- Choose one measurable output.
- Save the note.

Search Demand Thesis: Core Framework

Framework: thesis -> method -> asset -> proof -> traffic -> checkout -> feedback. Apply it to Template Marketplace SEO Playbook.

The core thesis is: Template SEO works when the listing mirrors the buyer's exact use case and shows the asset clearly.

Academic structure makes the product feel more valuable because the reader can see the logic, definitions, method, practice, and review criteria.

AI Agent Prompt

Act as Listing Writer. For Template Marketplace SEO Playbook, create a practical Search Demand Thesis deliverable using Google Sheets. Include steps, asset, QA, and SEO angle.

Practical Action

- Define key term.
- Write 3-step method.
- Add proof requirement.
- Create one exercise.

Search Demand Thesis: No-Code Stack

Low-budget stack focus: Pinterest. Use it to make one part of the product real, not to create tool complexity.

Primary stack for this product: Canva, Google Sheets, Pinterest, Gumroad, Payhip, Framer or Carrd, Google Search Console.

Possible upgrades include Framer for polished pages, Softr for portals, Make/Zapier/n8n for automation, and Looker Studio for analytics after the manual version works.

AI Agent Prompt

Act as Thumbnail Agent. For Template Marketplace SEO Playbook, create a practical Search Demand Thesis deliverable using Pinterest. Include steps, asset, QA, and SEO angle.

Practical Action

- Assign this tool one job.
- Create the first draft.
- Export or screenshot proof.
- Record cost and limits.

Search Demand Thesis: Manual Path

Manual path step: write FAQ.

Manual execution builds judgment. It also creates the checklist that later becomes an SOP, a template, an AI prompt, or an automation.

Do the task once slowly, document the decision points, and mark which parts require human review.

AI Agent Prompt

Act as FAQ Agent. For Template Marketplace SEO Playbook, create a practical Search Demand Thesis deliverable using Gumroad. Include steps, asset, QA, and SEO angle.

Practical Action

- Perform the manual step.
- Write inputs.
- Write output.
- Write quality check.
- Mark automation candidate.

Search Demand Thesis: AI Agent Workflow

AI agent role: Pinterest Repurposer. Give this agent a narrow job, a clear output format, and a strict quality gate.

Use the agent to support search demand thesis, not to outsource strategy. The human still chooses positioning, claims, pricing, examples, and final publishing decisions.

A strong agent workflow includes context, examples, constraints, output format, review rubric, and a request for uncertainty or risk notes.

AI Agent Prompt

Act as Pinterest Repurposer. For Template Marketplace SEO Playbook, create a practical Search Demand Thesis deliverable using Payhip. Include steps, asset, QA, and SEO angle.

Practical Action

- Open agent chat.
- Paste context.
- Request draft.
- Ask for risks.
- Revise manually.

Search Demand Thesis: Template And Example

Template asset: title bank. This is what turns the lesson into something the buyer can use.

Search page angle: spreadsheet template listing examples. Use this angle for a support article, FAQ section, or product page subsection.

Launch channel: Etsy-style listing. Adapt the same asset into one public demonstration that teaches and leads back to the product.

AI Agent Prompt

Act as Keyword Miner. For Template Marketplace SEO Playbook, create a practical Search Demand Thesis deliverable using Framer or Carrd. Include steps, asset, QA, and SEO angle.

Practical Action

- Create the asset.
- Write the search page title.
- Draft one demo post.
- Add CTA to product.

Search Demand Thesis: Review Gate

Review gate for Search Demand Thesis: the page is ready only if it teaches a method, creates an asset, supports search visibility, and avoids unsupported promises.

Pricing context: $29 SEO guide, $79 listing kit, $199 template visibility pack, $599 audit. Use the chapter to strengthen a product tier, bonus, license, or upgrade offer.

Claims review: no guaranteed rankings, income, traffic, or platform outcomes. Promise the system, assets, and implementation path.

AI Agent Prompt

Act as Listing Writer. For Template Marketplace SEO Playbook, create a practical Search Demand Thesis deliverable using Google Search Console. Include steps, asset, QA, and SEO angle.

Practical Action

- Score clarity 1-5.
- Score usefulness 1-5.
- Add one proof asset.
- Review search intent.
- Review claims.

Buyer Problem Model: Research Question

Research question: how can template sellers who want visibility across marketplaces and search engines use buyer problem model to move from a vague idea to a valuable digital product?

Chapter goal: Translate broad traffic into a specific buyer, urgent pain, and paid transformation.

The buyer pain is specific: their templates are useful but titles, thumbnails, keywords, and proof do not match buyer intent. The page should turn that pain into a visible decision, asset, workflow, or search page.

AI Agent Prompt

Act as Listing Writer. For Template Marketplace SEO Playbook, create a practical Buyer Problem Model deliverable using Google Sheets. Include steps, asset, QA, and SEO angle.

Practical Action

- Write the research question.
- Name the buyer assumption.
- Choose one measurable output.
- Save the note.

Buyer Problem Model: Core Framework

Framework: thesis -> method -> asset -> proof -> traffic -> checkout -> feedback. Apply it to Template Marketplace SEO Playbook.

The core thesis is: Template SEO works when the listing mirrors the buyer's exact use case and shows the asset clearly.

Academic structure makes the product feel more valuable because the reader can see the logic, definitions, method, practice, and review criteria.

AI Agent Prompt

Act as Thumbnail Agent. For Template Marketplace SEO Playbook, create a practical Buyer Problem Model deliverable using Pinterest. Include steps, asset, QA, and SEO angle.

Practical Action

- Define key term.
- Write 3-step method.
- Add proof requirement.
- Create one exercise.

Buyer Problem Model: No-Code Stack

Low-budget stack focus: Gumroad. Use it to make one part of the product real, not to create tool complexity.

Primary stack for this product: Canva, Google Sheets, Pinterest, Gumroad, Payhip, Framer or Carrd, Google Search Console.

Possible upgrades include Framer for polished pages, Softr for portals, Make/Zapier/n8n for automation, and Looker Studio for analytics after the manual version works.

AI Agent Prompt

Act as FAQ Agent. For Template Marketplace SEO Playbook, create a practical Buyer Problem Model deliverable using Gumroad. Include steps, asset, QA, and SEO angle.

Practical Action

- Assign this tool one job.
- Create the first draft.
- Export or screenshot proof.
- Record cost and limits.

Buyer Problem Model: Manual Path

Manual path step: pin examples.

Manual execution builds judgment. It also creates the checklist that later becomes an SOP, a template, an AI prompt, or an automation.

Do the task once slowly, document the decision points, and mark which parts require human review.

AI Agent Prompt

Act as Pinterest Repurposer. For Template Marketplace SEO Playbook, create a practical Buyer Problem Model deliverable using Payhip. Include steps, asset, QA, and SEO angle.

Practical Action

- Perform the manual step.
- Write inputs.
- Write output.
- Write quality check.
- Mark automation candidate.

Buyer Problem Model: AI Agent Workflow

AI agent role: Keyword Miner. Give this agent a narrow job, a clear output format, and a strict quality gate.

Use the agent to support buyer problem model, not to outsource strategy. The human still chooses positioning, claims, pricing, examples, and final publishing decisions.

A strong agent workflow includes context, examples, constraints, output format, review rubric, and a request for uncertainty or risk notes.

AI Agent Prompt

Act as Keyword Miner. For Template Marketplace SEO Playbook, create a practical Buyer Problem Model deliverable using Framer or Carrd. Include steps, asset, QA, and SEO angle.

Practical Action

- Open agent chat.
- Paste context.
- Request draft.
- Ask for risks.
- Revise manually.

Buyer Problem Model: Template And Example

Template asset: thumbnail grid. This is what turns the lesson into something the buyer can use.

Search page angle: Canva template SEO. Use this angle for a support article, FAQ section, or product page subsection.

Launch channel: SEO blog. Adapt the same asset into one public demonstration that teaches and leads back to the product.

AI Agent Prompt

Act as Listing Writer. For Template Marketplace SEO Playbook, create a practical Buyer Problem Model deliverable using Google Search Console. Include steps, asset, QA, and SEO angle.

Practical Action

- Create the asset.
- Write the search page title.
- Draft one demo post.
- Add CTA to product.

Buyer Problem Model: Review Gate

Review gate for Buyer Problem Model: the page is ready only if it teaches a method, creates an asset, supports search visibility, and avoids unsupported promises.

Pricing context: $29 SEO guide, $79 listing kit, $199 template visibility pack, $599 audit. Use the chapter to strengthen a product tier, bonus, license, or upgrade offer.

Claims review: no guaranteed rankings, income, traffic, or platform outcomes. Promise the system, assets, and implementation path.

AI Agent Prompt

Act as Thumbnail Agent. For Template Marketplace SEO Playbook, create a practical Buyer Problem Model deliverable using Canva. Include steps, asset, QA, and SEO angle.

Practical Action

- Score clarity 1-5.
- Score usefulness 1-5.
- Add one proof asset.
- Review search intent.
- Review claims.

Low-Budget Stack Architecture: Research Question

Research question: how can template sellers who want visibility across marketplaces and search engines use low-budget stack architecture to move from a vague idea to a valuable digital product?

Chapter goal: Choose the simplest stack that can publish, sell, deliver, and update the offer.

The buyer pain is specific: their templates are useful but titles, thumbnails, keywords, and proof do not match buyer intent. The page should turn that pain into a visible decision, asset, workflow, or search page.

AI Agent Prompt

Act as Thumbnail Agent. For Template Marketplace SEO Playbook, create a practical Low-Budget Stack Architecture deliverable using Pinterest. Include steps, asset, QA, and SEO angle.

Practical Action

- Write the research question.
- Name the buyer assumption.
- Choose one measurable output.
- Save the note.

Low-Budget Stack Architecture: Core Framework

Framework: thesis -> method -> asset -> proof -> traffic -> checkout -> feedback. Apply it to Template Marketplace SEO Playbook.

The core thesis is: Template SEO works when the listing mirrors the buyer's exact use case and shows the asset clearly.

Academic structure makes the product feel more valuable because the reader can see the logic, definitions, method, practice, and review criteria.

AI Agent Prompt

Act as FAQ Agent. For Template Marketplace SEO Playbook, create a practical Low-Budget Stack Architecture deliverable using Gumroad. Include steps, asset, QA, and SEO angle.

Practical Action

- Define key term.
- Write 3-step method.
- Add proof requirement.
- Create one exercise.

Low-Budget Stack Architecture: No-Code Stack

Low-budget stack focus: Payhip. Use it to make one part of the product real, not to create tool complexity.

Primary stack for this product: Canva, Google Sheets, Pinterest, Gumroad, Payhip, Framer or Carrd, Google Search Console.

Possible upgrades include Framer for polished pages, Softr for portals, Make/Zapier/n8n for automation, and Looker Studio for analytics after the manual version works.

AI Agent Prompt

Act as Pinterest Repurposer. For Template Marketplace SEO Playbook, create a practical Low-Budget Stack Architecture deliverable using Payhip. Include steps, asset, QA, and SEO angle.

Practical Action

- Assign this tool one job.
- Create the first draft.
- Export or screenshot proof.
- Record cost and limits.

Low-Budget Stack Architecture: Manual Path

Manual path step: track clicks.

Manual execution builds judgment. It also creates the checklist that later becomes an SOP, a template, an AI prompt, or an automation.

Do the task once slowly, document the decision points, and mark which parts require human review.

AI Agent Prompt

Act as Keyword Miner. For Template Marketplace SEO Playbook, create a practical Low-Budget Stack Architecture deliverable using Framer or Carrd. Include steps, asset, QA, and SEO angle.

Practical Action

- Perform the manual step.
- Write inputs.
- Write output.
- Write quality check.
- Mark automation candidate.

Low-Budget Stack Architecture: AI Agent Workflow

AI agent role: Listing Writer. Give this agent a narrow job, a clear output format, and a strict quality gate.

Use the agent to support low-budget stack architecture, not to outsource strategy. The human still chooses positioning, claims, pricing, examples, and final publishing decisions.

A strong agent workflow includes context, examples, constraints, output format, review rubric, and a request for uncertainty or risk notes.

AI Agent Prompt

Act as Listing Writer. For Template Marketplace SEO Playbook, create a practical Low-Budget Stack Architecture deliverable using Google Search Console. Include steps, asset, QA, and SEO angle.

Practical Action

- Open agent chat.
- Paste context.
- Request draft.
- Ask for risks.
- Revise manually.

Low-Budget Stack Architecture: Template And Example

Template asset: tag sheet. This is what turns the lesson into something the buyer can use.

Search page angle: Notion template keywords. Use this angle for a support article, FAQ section, or product page subsection.

Launch channel: Instagram carousel. Adapt the same asset into one public demonstration that teaches and leads back to the product.

AI Agent Prompt

Act as Thumbnail Agent. For Template Marketplace SEO Playbook, create a practical Low-Budget Stack Architecture deliverable using Canva. Include steps, asset, QA, and SEO angle.

Practical Action

- Create the asset.
- Write the search page title.
- Draft one demo post.
- Add CTA to product.

Low-Budget Stack Architecture: Review Gate

Review gate for Low-Budget Stack Architecture: the page is ready only if it teaches a method, creates an asset, supports search visibility, and avoids unsupported promises.

Pricing context: $29 SEO guide, $79 listing kit, $199 template visibility pack, $599 audit. Use the chapter to strengthen a product tier, bonus, license, or upgrade offer.

Claims review: no guaranteed rankings, income, traffic, or platform outcomes. Promise the system, assets, and implementation path.

AI Agent Prompt

Act as FAQ Agent. For Template Marketplace SEO Playbook, create a practical Low-Budget Stack Architecture deliverable using Google Sheets. Include steps, asset, QA, and SEO angle.

Practical Action

- Score clarity 1-5.
- Score usefulness 1-5.
- Add one proof asset.
- Review search intent.
- Review claims.

Manual Path Before Automation: Research Question

Research question: how can template sellers who want visibility across marketplaces and search engines use manual path before automation to move from a vague idea to a valuable digital product?

Chapter goal: Build the same system by hand first so the no-code workflow has a clear job.

The buyer pain is specific: their templates are useful but titles, thumbnails, keywords, and proof do not match buyer intent. The page should turn that pain into a visible decision, asset, workflow, or search page.

AI Agent Prompt

Act as FAQ Agent. For Template Marketplace SEO Playbook, create a practical Manual Path Before Automation deliverable using Gumroad. Include steps, asset, QA, and SEO angle.

Practical Action

- Write the research question.
- Name the buyer assumption.
- Choose one measurable output.
- Save the note.

Manual Path Before Automation: Core Framework

Framework: thesis -> method -> asset -> proof -> traffic -> checkout -> feedback. Apply it to Template Marketplace SEO Playbook.

The core thesis is: Template SEO works when the listing mirrors the buyer's exact use case and shows the asset clearly.

Academic structure makes the product feel more valuable because the reader can see the logic, definitions, method, practice, and review criteria.

AI Agent Prompt

Act as Pinterest Repurposer. For Template Marketplace SEO Playbook, create a practical Manual Path Before Automation deliverable using Payhip. Include steps, asset, QA, and SEO angle.

Practical Action

- Define key term.
- Write 3-step method.
- Add proof requirement.
- Create one exercise.

Manual Path Before Automation: No-Code Stack

Low-budget stack focus: Framer or Carrd. Use it to make one part of the product real, not to create tool complexity.

Primary stack for this product: Canva, Google Sheets, Pinterest, Gumroad, Payhip, Framer or Carrd, Google Search Console.

Possible upgrades include Framer for polished pages, Softr for portals, Make/Zapier/n8n for automation, and Looker Studio for analytics after the manual version works.

AI Agent Prompt

Act as Keyword Miner. For Template Marketplace SEO Playbook, create a practical Manual Path Before Automation deliverable using Framer or Carrd. Include steps, asset, QA, and SEO angle.

Practical Action

- Assign this tool one job.
- Create the first draft.
- Export or screenshot proof.
- Record cost and limits.

Manual Path Before Automation: Manual Path

Manual path step: research autocomplete.

Manual execution builds judgment. It also creates the checklist that later becomes an SOP, a template, an AI prompt, or an automation.

Do the task once slowly, document the decision points, and mark which parts require human review.

AI Agent Prompt

Act as Listing Writer. For Template Marketplace SEO Playbook, create a practical Manual Path Before Automation deliverable using Google Search Console. Include steps, asset, QA, and SEO angle.

Practical Action

- Perform the manual step.
- Write inputs.
- Write output.
- Write quality check.
- Mark automation candidate.

Manual Path Before Automation: AI Agent Workflow

AI agent role: Thumbnail Agent. Give this agent a narrow job, a clear output format, and a strict quality gate.

Use the agent to support manual path before automation, not to outsource strategy. The human still chooses positioning, claims, pricing, examples, and final publishing decisions.

A strong agent workflow includes context, examples, constraints, output format, review rubric, and a request for uncertainty or risk notes.

AI Agent Prompt

Act as Thumbnail Agent. For Template Marketplace SEO Playbook, create a practical Manual Path Before Automation deliverable using Canva. Include steps, asset, QA, and SEO angle.

Practical Action

- Open agent chat.
- Paste context.
- Request draft.
- Ask for risks.
- Revise manually.

Manual Path Before Automation: Template And Example

Template asset: FAQ blocks. This is what turns the lesson into something the buyer can use.

Search page angle: spreadsheet template listing examples. Use this angle for a support article, FAQ section, or product page subsection.

Launch channel: Pinterest. Adapt the same asset into one public demonstration that teaches and leads back to the product.

AI Agent Prompt

Act as FAQ Agent. For Template Marketplace SEO Playbook, create a practical Manual Path Before Automation deliverable using Google Sheets. Include steps, asset, QA, and SEO angle.

Practical Action

- Create the asset.
- Write the search page title.
- Draft one demo post.
- Add CTA to product.

Manual Path Before Automation: Review Gate

Review gate for Manual Path Before Automation: the page is ready only if it teaches a method, creates an asset, supports search visibility, and avoids unsupported promises.

Pricing context: $29 SEO guide, $79 listing kit, $199 template visibility pack, $599 audit. Use the chapter to strengthen a product tier, bonus, license, or upgrade offer.

Claims review: no guaranteed rankings, income, traffic, or platform outcomes. Promise the system, assets, and implementation path.

AI Agent Prompt

Act as Pinterest Repurposer. For Template Marketplace SEO Playbook, create a practical Manual Path Before Automation deliverable using Pinterest. Include steps, asset, QA, and SEO angle.

Practical Action

- Score clarity 1-5.
- Score usefulness 1-5.
- Add one proof asset.
- Review search intent.
- Review claims.

AI Agent Operating Roles: Research Question

Research question: how can template sellers who want visibility across marketplaces and search engines use ai agent operating roles to move from a vague idea to a valuable digital product?

Chapter goal: Assign research, production, QA, copy, support, and analytics roles to AI agents.

The buyer pain is specific: their templates are useful but titles, thumbnails, keywords, and proof do not match buyer intent. The page should turn that pain into a visible decision, asset, workflow, or search page.

AI Agent Prompt

Act as Pinterest Repurposer. For Template Marketplace SEO Playbook, create a practical AI Agent Operating Roles deliverable using Payhip. Include steps, asset, QA, and SEO angle.

Practical Action

- Write the research question.
- Name the buyer assumption.
- Choose one measurable output.
- Save the note.

AI Agent Operating Roles: Core Framework

Framework: thesis -> method -> asset -> proof -> traffic -> checkout -> feedback. Apply it to Template Marketplace SEO Playbook.

The core thesis is: Template SEO works when the listing mirrors the buyer's exact use case and shows the asset clearly.

Academic structure makes the product feel more valuable because the reader can see the logic, definitions, method, practice, and review criteria.

AI Agent Prompt

Act as Keyword Miner. For Template Marketplace SEO Playbook, create a practical AI Agent Operating Roles deliverable using Framer or Carrd. Include steps, asset, QA, and SEO angle.

Practical Action

- Define key term.
- Write 3-step method.
- Add proof requirement.
- Create one exercise.

AI Agent Operating Roles: No-Code Stack

Low-budget stack focus: Google Search Console. Use it to make one part of the product real, not to create tool complexity.

Primary stack for this product: Canva, Google Sheets, Pinterest, Gumroad, Payhip, Framer or Carrd, Google Search Console.

Possible upgrades include Framer for polished pages, Softr for portals, Make/Zapier/n8n for automation, and Looker Studio for analytics after the manual version works.

AI Agent Prompt

Act as Listing Writer. For Template Marketplace SEO Playbook, create a practical AI Agent Operating Roles deliverable using Google Search Console. Include steps, asset, QA, and SEO angle.

Practical Action

- Assign this tool one job.
- Create the first draft.
- Export or screenshot proof.
- Record cost and limits.

AI Agent Operating Roles: Manual Path

Manual path step: write listing title.

Manual execution builds judgment. It also creates the checklist that later becomes an SOP, a template, an AI prompt, or an automation.

Do the task once slowly, document the decision points, and mark which parts require human review.

AI Agent Prompt

Act as Thumbnail Agent. For Template Marketplace SEO Playbook, create a practical AI Agent Operating Roles deliverable using Canva. Include steps, asset, QA, and SEO angle.

Practical Action

- Perform the manual step.
- Write inputs.
- Write output.
- Write quality check.
- Mark automation candidate.

AI Agent Operating Roles: AI Agent Workflow

AI agent role: FAQ Agent. Give this agent a narrow job, a clear output format, and a strict quality gate.

Use the agent to support ai agent operating roles, not to outsource strategy. The human still chooses positioning, claims, pricing, examples, and final publishing decisions.

A strong agent workflow includes context, examples, constraints, output format, review rubric, and a request for uncertainty or risk notes.

AI Agent Prompt

Act as FAQ Agent. For Template Marketplace SEO Playbook, create a practical AI Agent Operating Roles deliverable using Google Sheets. Include steps, asset, QA, and SEO angle.

Practical Action

- Open agent chat.
- Paste context.
- Request draft.
- Ask for risks.
- Revise manually.

AI Agent Operating Roles: Template And Example

Template asset: preview carousel. This is what turns the lesson into something the buyer can use.

Search page angle: Canva template SEO. Use this angle for a support article, FAQ section, or product page subsection.

Launch channel: Etsy-style listing. Adapt the same asset into one public demonstration that teaches and leads back to the product.

AI Agent Prompt

Act as Pinterest Repurposer. For Template Marketplace SEO Playbook, create a practical AI Agent Operating Roles deliverable using Pinterest. Include steps, asset, QA, and SEO angle.

Practical Action

- Create the asset.
- Write the search page title.
- Draft one demo post.
- Add CTA to product.

AI Agent Operating Roles: Review Gate

Review gate for AI Agent Operating Roles: the page is ready only if it teaches a method, creates an asset, supports search visibility, and avoids unsupported promises.

Pricing context: $29 SEO guide, $79 listing kit, $199 template visibility pack, $599 audit. Use the chapter to strengthen a product tier, bonus, license, or upgrade offer.

Claims review: no guaranteed rankings, income, traffic, or platform outcomes. Promise the system, assets, and implementation path.

AI Agent Prompt

Act as Keyword Miner. For Template Marketplace SEO Playbook, create a practical AI Agent Operating Roles deliverable using Gumroad. Include steps, asset, QA, and SEO angle.

Practical Action

- Score clarity 1-5.
- Score usefulness 1-5.
- Add one proof asset.
- Review search intent.
- Review claims.

Academic Product Structure: Research Question

Research question: how can template sellers who want visibility across marketplaces and search engines use academic product structure to move from a vague idea to a valuable digital product?

Chapter goal: Turn the book into abstract, definitions, method, modules, evidence, practice, and review.

The buyer pain is specific: their templates are useful but titles, thumbnails, keywords, and proof do not match buyer intent. The page should turn that pain into a visible decision, asset, workflow, or search page.

AI Agent Prompt

Act as Keyword Miner. For Template Marketplace SEO Playbook, create a practical Academic Product Structure deliverable using Framer or Carrd. Include steps, asset, QA, and SEO angle.

Practical Action

- Write the research question.
- Name the buyer assumption.
- Choose one measurable output.
- Save the note.

Academic Product Structure: Core Framework

Framework: thesis -> method -> asset -> proof -> traffic -> checkout -> feedback. Apply it to Template Marketplace SEO Playbook.

The core thesis is: Template SEO works when the listing mirrors the buyer's exact use case and shows the asset clearly.

Academic structure makes the product feel more valuable because the reader can see the logic, definitions, method, practice, and review criteria.

AI Agent Prompt

Act as Listing Writer. For Template Marketplace SEO Playbook, create a practical Academic Product Structure deliverable using Google Search Console. Include steps, asset, QA, and SEO angle.

Practical Action

- Define key term.
- Write 3-step method.
- Add proof requirement.
- Create one exercise.

Academic Product Structure: No-Code Stack

Low-budget stack focus: Canva. Use it to make one part of the product real, not to create tool complexity.

Primary stack for this product: Canva, Google Sheets, Pinterest, Gumroad, Payhip, Framer or Carrd, Google Search Console.

Possible upgrades include Framer for polished pages, Softr for portals, Make/Zapier/n8n for automation, and Looker Studio for analytics after the manual version works.

AI Agent Prompt

Act as Thumbnail Agent. For Template Marketplace SEO Playbook, create a practical Academic Product Structure deliverable using Canva. Include steps, asset, QA, and SEO angle.

Practical Action

- Assign this tool one job.
- Create the first draft.
- Export or screenshot proof.
- Record cost and limits.

Academic Product Structure: Manual Path

Manual path step: create preview image.

Manual execution builds judgment. It also creates the checklist that later becomes an SOP, a template, an AI prompt, or an automation.

Do the task once slowly, document the decision points, and mark which parts require human review.

AI Agent Prompt

Act as FAQ Agent. For Template Marketplace SEO Playbook, create a practical Academic Product Structure deliverable using Google Sheets. Include steps, asset, QA, and SEO angle.

Practical Action

- Perform the manual step.
- Write inputs.
- Write output.
- Write quality check.
- Mark automation candidate.

Academic Product Structure: AI Agent Workflow

AI agent role: Pinterest Repurposer. Give this agent a narrow job, a clear output format, and a strict quality gate.

Use the agent to support academic product structure, not to outsource strategy. The human still chooses positioning, claims, pricing, examples, and final publishing decisions.

A strong agent workflow includes context, examples, constraints, output format, review rubric, and a request for uncertainty or risk notes.

AI Agent Prompt

Act as Pinterest Repurposer. For Template Marketplace SEO Playbook, create a practical Academic Product Structure deliverable using Pinterest. Include steps, asset, QA, and SEO angle.

Practical Action

- Open agent chat.
- Paste context.
- Request draft.
- Ask for risks.
- Revise manually.

Academic Product Structure: Template And Example

Template asset: title bank. This is what turns the lesson into something the buyer can use.

Search page angle: Notion template keywords. Use this angle for a support article, FAQ section, or product page subsection.

Launch channel: SEO blog. Adapt the same asset into one public demonstration that teaches and leads back to the product.

AI Agent Prompt

Act as Keyword Miner. For Template Marketplace SEO Playbook, create a practical Academic Product Structure deliverable using Gumroad. Include steps, asset, QA, and SEO angle.

Practical Action

- Create the asset.
- Write the search page title.
- Draft one demo post.
- Add CTA to product.

Academic Product Structure: Review Gate

Review gate for Academic Product Structure: the page is ready only if it teaches a method, creates an asset, supports search visibility, and avoids unsupported promises.

Pricing context: $29 SEO guide, $79 listing kit, $199 template visibility pack, $599 audit. Use the chapter to strengthen a product tier, bonus, license, or upgrade offer.

Claims review: no guaranteed rankings, income, traffic, or platform outcomes. Promise the system, assets, and implementation path.

AI Agent Prompt

Act as Listing Writer. For Template Marketplace SEO Playbook, create a practical Academic Product Structure deliverable using Payhip. Include steps, asset, QA, and SEO angle.

Practical Action

- Score clarity 1-5.
- Score usefulness 1-5.
- Add one proof asset.
- Review search intent.
- Review claims.

Asset Production Sprint: Research Question

Research question: how can template sellers who want visibility across marketplaces and search engines use asset production sprint to move from a vague idea to a valuable digital product?

Chapter goal: Create PDFs, templates, prompts, spreadsheets, forms, dashboards, and screenshots.

The buyer pain is specific: their templates are useful but titles, thumbnails, keywords, and proof do not match buyer intent. The page should turn that pain into a visible decision, asset, workflow, or search page.

AI Agent Prompt

Act as Listing Writer. For Template Marketplace SEO Playbook, create a practical Asset Production Sprint deliverable using Google Search Console. Include steps, asset, QA, and SEO angle.

Practical Action

- Write the research question.
- Name the buyer assumption.
- Choose one measurable output.
- Save the note.

Asset Production Sprint: Core Framework

Framework: thesis -> method -> asset -> proof -> traffic -> checkout -> feedback. Apply it to Template Marketplace SEO Playbook.

The core thesis is: Template SEO works when the listing mirrors the buyer's exact use case and shows the asset clearly.

Academic structure makes the product feel more valuable because the reader can see the logic, definitions, method, practice, and review criteria.

AI Agent Prompt

Act as Thumbnail Agent. For Template Marketplace SEO Playbook, create a practical Asset Production Sprint deliverable using Canva. Include steps, asset, QA, and SEO angle.

Practical Action

- Define key term.
- Write 3-step method.
- Add proof requirement.
- Create one exercise.

Asset Production Sprint: No-Code Stack

Low-budget stack focus: Google Sheets. Use it to make one part of the product real, not to create tool complexity.

Primary stack for this product: Canva, Google Sheets, Pinterest, Gumroad, Payhip, Framer or Carrd, Google Search Console.

Possible upgrades include Framer for polished pages, Softr for portals, Make/Zapier/n8n for automation, and Looker Studio for analytics after the manual version works.

AI Agent Prompt

Act as FAQ Agent. For Template Marketplace SEO Playbook, create a practical Asset Production Sprint deliverable using Google Sheets. Include steps, asset, QA, and SEO angle.

Practical Action

- Assign this tool one job.
- Create the first draft.
- Export or screenshot proof.
- Record cost and limits.

Asset Production Sprint: Manual Path

Manual path step: write FAQ.

Manual execution builds judgment. It also creates the checklist that later becomes an SOP, a template, an AI prompt, or an automation.

Do the task once slowly, document the decision points, and mark which parts require human review.

AI Agent Prompt

Act as Pinterest Repurposer. For Template Marketplace SEO Playbook, create a practical Asset Production Sprint deliverable using Pinterest. Include steps, asset, QA, and SEO angle.

Practical Action

- Perform the manual step.
- Write inputs.
- Write output.
- Write quality check.
- Mark automation candidate.

Asset Production Sprint: AI Agent Workflow

AI agent role: Keyword Miner. Give this agent a narrow job, a clear output format, and a strict quality gate.

Use the agent to support asset production sprint, not to outsource strategy. The human still chooses positioning, claims, pricing, examples, and final publishing decisions.

A strong agent workflow includes context, examples, constraints, output format, review rubric, and a request for uncertainty or risk notes.

AI Agent Prompt

Act as Keyword Miner. For Template Marketplace SEO Playbook, create a practical Asset Production Sprint deliverable using Gumroad. Include steps, asset, QA, and SEO angle.

Practical Action

- Open agent chat.
- Paste context.
- Request draft.
- Ask for risks.
- Revise manually.

Asset Production Sprint: Template And Example

Template asset: thumbnail grid. This is what turns the lesson into something the buyer can use.

Search page angle: spreadsheet template listing examples. Use this angle for a support article, FAQ section, or product page subsection.

Launch channel: Instagram carousel. Adapt the same asset into one public demonstration that teaches and leads back to the product.

AI Agent Prompt

Act as Listing Writer. For Template Marketplace SEO Playbook, create a practical Asset Production Sprint deliverable using Payhip. Include steps, asset, QA, and SEO angle.

Practical Action

- Create the asset.
- Write the search page title.
- Draft one demo post.
- Add CTA to product.

Asset Production Sprint: Review Gate

Review gate for Asset Production Sprint: the page is ready only if it teaches a method, creates an asset, supports search visibility, and avoids unsupported promises.

Pricing context: $29 SEO guide, $79 listing kit, $199 template visibility pack, $599 audit. Use the chapter to strengthen a product tier, bonus, license, or upgrade offer.

Claims review: no guaranteed rankings, income, traffic, or platform outcomes. Promise the system, assets, and implementation path.

AI Agent Prompt

Act as Thumbnail Agent. For Template Marketplace SEO Playbook, create a practical Asset Production Sprint deliverable using Framer or Carrd. Include steps, asset, QA, and SEO angle.

Practical Action

- Score clarity 1-5.
- Score usefulness 1-5.
- Add one proof asset.
- Review search intent.
- Review claims.

SEO Product Page System: Research Question

Research question: how can template sellers who want visibility across marketplaces and search engines use seo product page system to move from a vague idea to a valuable digital product?

Chapter goal: Build product pages with intent match, proof assets, FAQs, internal links, and schema-ready facts.

The buyer pain is specific: their templates are useful but titles, thumbnails, keywords, and proof do not match buyer intent. The page should turn that pain into a visible decision, asset, workflow, or search page.

AI Agent Prompt

Act as Thumbnail Agent. For Template Marketplace SEO Playbook, create a practical SEO Product Page System deliverable using Canva. Include steps, asset, QA, and SEO angle.

Practical Action

- Write the research question.
- Name the buyer assumption.
- Choose one measurable output.
- Save the note.

SEO Product Page System: Core Framework

Framework: thesis -> method -> asset -> proof -> traffic -> checkout -> feedback. Apply it to Template Marketplace SEO Playbook.

The core thesis is: Template SEO works when the listing mirrors the buyer's exact use case and shows the asset clearly.

Academic structure makes the product feel more valuable because the reader can see the logic, definitions, method, practice, and review criteria.

AI Agent Prompt

Act as FAQ Agent. For Template Marketplace SEO Playbook, create a practical SEO Product Page System deliverable using Google Sheets. Include steps, asset, QA, and SEO angle.

Practical Action

- Define key term.
- Write 3-step method.
- Add proof requirement.
- Create one exercise.

SEO Product Page System: No-Code Stack

Low-budget stack focus: Pinterest. Use it to make one part of the product real, not to create tool complexity.

Primary stack for this product: Canva, Google Sheets, Pinterest, Gumroad, Payhip, Framer or Carrd, Google Search Console.

Possible upgrades include Framer for polished pages, Softr for portals, Make/Zapier/n8n for automation, and Looker Studio for analytics after the manual version works.

AI Agent Prompt

Act as Pinterest Repurposer. For Template Marketplace SEO Playbook, create a practical SEO Product Page System deliverable using Pinterest. Include steps, asset, QA, and SEO angle.

Practical Action

- Assign this tool one job.
- Create the first draft.
- Export or screenshot proof.
- Record cost and limits.

SEO Product Page System: Manual Path

Manual path step: pin examples.

Manual execution builds judgment. It also creates the checklist that later becomes an SOP, a template, an AI prompt, or an automation.

Do the task once slowly, document the decision points, and mark which parts require human review.

AI Agent Prompt

Act as Keyword Miner. For Template Marketplace SEO Playbook, create a practical SEO Product Page System deliverable using Gumroad. Include steps, asset, QA, and SEO angle.

Practical Action

- Perform the manual step.
- Write inputs.
- Write output.
- Write quality check.
- Mark automation candidate.

SEO Product Page System: AI Agent Workflow

AI agent role: Listing Writer. Give this agent a narrow job, a clear output format, and a strict quality gate.

Use the agent to support seo product page system, not to outsource strategy. The human still chooses positioning, claims, pricing, examples, and final publishing decisions.

A strong agent workflow includes context, examples, constraints, output format, review rubric, and a request for uncertainty or risk notes.

AI Agent Prompt

Act as Listing Writer. For Template Marketplace SEO Playbook, create a practical SEO Product Page System deliverable using Payhip. Include steps, asset, QA, and SEO angle.

Practical Action

- Open agent chat.
- Paste context.
- Request draft.
- Ask for risks.
- Revise manually.

SEO Product Page System: Template And Example

Template asset: tag sheet. This is what turns the lesson into something the buyer can use.

Search page angle: Canva template SEO. Use this angle for a support article, FAQ section, or product page subsection.

Launch channel: Pinterest. Adapt the same asset into one public demonstration that teaches and leads back to the product.

AI Agent Prompt

Act as Thumbnail Agent. For Template Marketplace SEO Playbook, create a practical SEO Product Page System deliverable using Framer or Carrd. Include steps, asset, QA, and SEO angle.

Practical Action

- Create the asset.
- Write the search page title.
- Draft one demo post.
- Add CTA to product.

SEO Product Page System: Review Gate

Review gate for SEO Product Page System: the page is ready only if it teaches a method, creates an asset, supports search visibility, and avoids unsupported promises.

Pricing context: $29 SEO guide, $79 listing kit, $199 template visibility pack, $599 audit. Use the chapter to strengthen a product tier, bonus, license, or upgrade offer.

Claims review: no guaranteed rankings, income, traffic, or platform outcomes. Promise the system, assets, and implementation path.

AI Agent Prompt

Act as FAQ Agent. For Template Marketplace SEO Playbook, create a practical SEO Product Page System deliverable using Google Search Console. Include steps, asset, QA, and SEO angle.

Practical Action

- Score clarity 1-5.
- Score usefulness 1-5.
- Add one proof asset.
- Review search intent.
- Review claims.

Launch Content Flywheel: Research Question

Research question: how can template sellers who want visibility across marketplaces and search engines use launch content flywheel to move from a vague idea to a valuable digital product?

Chapter goal: Turn chapters into search pages, social posts, email lessons, demos, and partner pitches.

The buyer pain is specific: their templates are useful but titles, thumbnails, keywords, and proof do not match buyer intent. The page should turn that pain into a visible decision, asset, workflow, or search page.

AI Agent Prompt

Act as FAQ Agent. For Template Marketplace SEO Playbook, create a practical Launch Content Flywheel deliverable using Google Sheets. Include steps, asset, QA, and SEO angle.

Practical Action

- Write the research question.
- Name the buyer assumption.
- Choose one measurable output.
- Save the note.

Launch Content Flywheel: Core Framework

Framework: thesis -> method -> asset -> proof -> traffic -> checkout -> feedback. Apply it to Template Marketplace SEO Playbook.

The core thesis is: Template SEO works when the listing mirrors the buyer's exact use case and shows the asset clearly.

Academic structure makes the product feel more valuable because the reader can see the logic, definitions, method, practice, and review criteria.

AI Agent Prompt

Act as Pinterest Repurposer. For Template Marketplace SEO Playbook, create a practical Launch Content Flywheel deliverable using Pinterest. Include steps, asset, QA, and SEO angle.

Practical Action

- Define key term.
- Write 3-step method.
- Add proof requirement.
- Create one exercise.

Launch Content Flywheel: No-Code Stack

Low-budget stack focus: Gumroad. Use it to make one part of the product real, not to create tool complexity.

Primary stack for this product: Canva, Google Sheets, Pinterest, Gumroad, Payhip, Framer or Carrd, Google Search Console.

Possible upgrades include Framer for polished pages, Softr for portals, Make/Zapier/n8n for automation, and Looker Studio for analytics after the manual version works.

AI Agent Prompt

Act as Keyword Miner. For Template Marketplace SEO Playbook, create a practical Launch Content Flywheel deliverable using Gumroad. Include steps, asset, QA, and SEO angle.

Practical Action

- Assign this tool one job.
- Create the first draft.
- Export or screenshot proof.
- Record cost and limits.

Launch Content Flywheel: Manual Path

Manual path step: track clicks.

Manual execution builds judgment. It also creates the checklist that later becomes an SOP, a template, an AI prompt, or an automation.

Do the task once slowly, document the decision points, and mark which parts require human review.

AI Agent Prompt

Act as Listing Writer. For Template Marketplace SEO Playbook, create a practical Launch Content Flywheel deliverable using Payhip. Include steps, asset, QA, and SEO angle.

Practical Action

- Perform the manual step.
- Write inputs.
- Write output.
- Write quality check.
- Mark automation candidate.

Launch Content Flywheel: AI Agent Workflow

AI agent role: Thumbnail Agent. Give this agent a narrow job, a clear output format, and a strict quality gate.

Use the agent to support launch content flywheel, not to outsource strategy. The human still chooses positioning, claims, pricing, examples, and final publishing decisions.

- Score usefulness 1-5.
- Add one proof asset.
- Review search intent.
- Review claims.

Keyword Research Sheet

Short-tail: template SEO.

Mid-tail: digital template SEO.

Long-tail: SEO for Canva Notion spreadsheet templates.

Build one page for the long-tail keyword first because it is closest to buyer intent. Use the mid-tail phrase in the product title and the short-tail phrase in category context.

AI Agent Prompt

Generate 25 keyword variants grouped by product page, FAQ, comparison page, and tutorial.

Practical Action

- Write 10 long-tail variants.
- Choose 3 FAQs.
- Write title tag.
- Add internal link.

No-Code Stack Comparison

Primary stack: Canva, Google Sheets, Pinterest, Gumroad, Payhip, Framer or Carrd, Google Search Console.

All possible low-code/no-code candidates: Google Docs, Google Sheets, Canva, Notion, Airtable, Coda, Tally, Typeform, Gumroad, Payhip, Stripe Payment Links, Carrd, Framer, Softr, Glide, Zapier, Make, n8n, MailerLite, ConvertKit, beehiiv, Buffer, Metricool, Pinterest, Google Search Console, Google Analytics, Looker Studio.

Comparison criteria: monthly cost, learning curve, exportability, checkout fit, delivery fit, automation fit, analytics, and support burden.

AI Agent Prompt

Compare these tools for cost, ease, buyer value, and when to upgrade.

Practical Action

- Create stack table.
- Score each tool.
- Pick minimum stack.
- Define upgrade trigger.

Manual Workflow SOP

Manual SOP format: Trigger, input, owner, steps, output, quality check, storage location, and upgrade note.

Manual path:

- research autocomplete
- write listing title
- create preview image
- write FAQ
- pin examples
- track clicks

The manual SOP is a product asset. Buyers trust practical systems when they can see exactly how the result is produced.

AI Agent Prompt

Convert this manual path into an SOP table with input, action, output, QA, and automation candidate.

Practical Action

- Write SOP.
- Add screenshots.
- Add mistake notes.
- Mark automation candidates.

AI Agent Prompt Library

Agent team: Keyword Miner, Listing Writer, Thumbnail Agent, FAQ Agent, Pinterest Repurposer.

Prompt format: Role, buyer, pain, desired output, sources, constraints, examples, format, quality rubric, and risk notes.

Keep agent outputs editable. Store the best outputs as templates, examples, or FAQ material.

AI Agent Prompt

Write role prompts for the full agent team with output format and review rubric.

Practical Action

- Create one prompt per agent.
- Test with one task.
- Save best version.
- Add QA checklist.

Sales Page Academic Outline

Sales page academic outline: abstract promise, buyer problem, thesis, method, contents, evidence, examples, FAQ, offer tiers, risk note, and CTA.

Core promise: create keyword-led template listings, preview assets, FAQs, and support pages that attract targeted buyers.

This structure makes the sales page feel researched and trustworthy while still staying direct.

AI Agent Prompt

Write a sales page using academic structure and direct-response clarity.

Practical Action

- Draft headline.
- Write method section.
- Add contents list.
- Add FAQ.
- Add CTA.

Low-Budget Launch Plan

Low-budget launch plan: preview asset, waitlist form, 5 education posts, 3 proof posts, 2 objection posts, 3 emails, 20 direct messages, and one post-launch feedback survey.

Launch channels: Pinterest, Etsy-style listing, SEO blog, Instagram carousel.

Launch on the cheapest channel where the buyer already asks questions.

AI Agent Prompt

Create a 14-day launch plan with daily actions, content angle, and CTA.

Practical Action

- Choose channel.
- Create preview.
- Write posts.
- Send outreach.
- Collect feedback.

Product Structured Data Checklist

Product structured data checklist: product name, description, image, price, currency, availability, brand, offer URL, refund/support facts, and FAQ content where eligible.

Use structured facts only when they accurately match the visible product page.

Structured data does not guarantee ranking. It helps eligible pages communicate facts clearly.

AI Agent Prompt

Create a structured product facts sheet for this digital product page.

Practical Action

- List product facts.
- Match facts to page.
- Add FAQ.
- Validate markup if used.
- Keep visible text consistent.

Final Publishing Review

Final publishing checklist for Template Marketplace SEO Playbook: 100-page PDF, keyword map, sales page, checkout, delivery email, support boundary, claim disclaimer, sample screenshots, and launch calendar.

Offer ladder: $29 SEO guide, $79 listing kit, $199 template visibility pack, $599 audit.

Publish when the buyer can understand the promise, preview the assets, buy the product, receive it cleanly, and know exactly how to start.

AI Agent Prompt

Audit this product for missing assets, risky claims, and weak buyer clarity.

Practical Action

- Check page count.
- Check links.
- Check checkout.
- Check delivery.
- Check claims.
